

Maintaining a safe environment for hospital staff and patients

Major concerns such as baby abduction, patient elopement, and theft of costly mobile equipment cause hospitals and healthcare facilities to be vulnerable public sites for security threats. As a result, it is pertinent to implement a thorough and effective security system into your healthcare facility. At TSI, we design and implement security systems that are both cost-effective and user-friendly. TSI has the experience and expertise to provide an integrated video surveillance system that will overcome all of your security obstacles and provide you the necessary tools to identify incidences before they become critical.

Patient & Asset Tracking

- * Patient tracking devices (i.e. tags, badges, wristbands) allow hospital staff to locate patients/newborns and track movement history, as well as send alerts based on activity/inactivity level, emergency needs and entry into restricted areas
- * Security personnel and clinical staff can locate, track and identify patients throughout the facility to safeguard against patient wandering, elopement, and abductions
- * Real-time video allows security personnel to immediately identify the location of an alarm and the individual or asset involved in the event

Access Control

- * Monitor restricted areas of clinical care such as infant/pediatric areas, med rooms (staff-only), emergency rooms, intensive care units, and pharmacy
- * Secure areas with patient medical records to prevent identity theft and the release of private information
- * Utilize perimeter lockdown systems for areas such as emergency rooms and maternity wards to provide immediate restricted access and allow security personnel to locate necessary individuals quickly
- * Restrict access to narcotic storage areas, equipment and utility rooms, and parking garages

Video Surveillance

- * Megapixel camera technology enables you to combine wide dynamic range, lowlight, anti-bloom capabilities, and thermal imaging all into one intelligent camera
- * Digital Video Recorders (DVRs) and Network Video Recorders (NVRs) have the ability to locate data, process images, and immediately process vital information
- * Video analytic software provides specific and detailed information regarding events and the type of alarm condition, and can send warning messages and/or videos to mobile devices, which reduces false alarms

Remote Management

- * Check quality of patient care, narcotic distribution, job performance, incidents, etc. all through live or recorded video from any authorized computer, smart phone, tablet or other device
- * Monitor and configure all features of your security system at any time through a secure network
- * Authorized staff are able to simultaneously access images and reports, and easily share them with other healthcare facilities across the world

We understand your security needs...

Safeguard Employees

- * Rely on POS, access control, panic buttons and intrusion alarms to quickly notify proper authorities
- * Help prevent patient-to-staff violence with video monitoring and alarm systems
- * Easily review and assess employee injury incidents, harassment, and improper procedures

Secure Parking Lot & Perimeter

- * Implement maximum video coverage to deter intrusion, theft and vandalism
- * Utilize license plate recognition software for easy vehicle identification
- * Post video surveillance signs to warn vandals that they are on camera

Improve Communication and Operations

- * Nurse call systems streamline communication from patient-to-staff and staff-to-staff while providing 24/7 monitoring, faster response times and better overall patient care and satisfaction
- * Video surveillance and people-tracking provide complete situational awareness in the case of national disasters
- * Access live and recorded video to easily identify false liability claims

“Providing local, fanatical customer service and support since 2004.”

“At TSI, we understand that hospitals and healthcare facilities have unique needs and stringent industry standards. Our security systems meet HIPAA, FIP 201, NIST SP 800-78, and other industry requirements, helping you to better manage your security concerns, provide a safe environment for patients, while also protecting patients’ privacy.”

Our Solutions.

- * IP and CCTV cameras
- * Digital Recording Solutions
- * Access Control
- * Intrusion Detection
- * Biometrics
- * Alarm Monitoring
- * Emergency Notification Systems
- * Paging/Sound
- * Life Safety Systems
- * Fire Detection Systems
- * License Plate Recognition and Virtual Fencing

Your Benefits.

- * Utilize access control, video surveillance and real-time tracking to keep patients, infants and hospital assets secure
- * Allow patients, visitors, staff, and the community to be welcomed in a safe and secure environment
- * Prevent violence against staff, patient elopement, and infant abduction
- * Prevent theft, break-ins, and vandalism
- * Streamline communication to provide complete situational awareness in the case of national disasters
- * Defend against false liability and damage claims
- * Optimize staff efficiency and productivity
- * Obtain hard evidence to prosecute criminal activity
- * Monitor your property from anywhere in the world at any time
- * Reduce total cost of ownership

Service Maintenance Agreement (SMA)

Our SMAs provide tangible, value-added services such as:

- * scheduled preventative maintenance
- * user training
- * priority response
- * remote and on-site support
- * additional discounts

A TSI SMA also enables you to budget for your service and maintenance costs in advance; it allows you to plan ahead for future expansions and upgrades of your system, minimizing hassle and unexpected costs.

Why Choose TSI?

As a leading national systems integrator, we practice a unique fanatical approach to customer service, in that we are dedicated to putting our customers' happiness and satisfaction above all else. Our desire is to build **trusted relationships** with each of our customers, and to provide prompt, reliable technical support.

With expanding offices across the nation, we promise to provide **local service** from our highly trained and certified technicians, to ensure quick response times when you need it most. We insist on using only the most reliable products from leading manufacturers, and as a result, we are able to **guarantee all of our installations and services.**

As we continue to set ourselves apart from our competitors through our devotion to **operating fairly and honestly**, we encourage you to contact us, and begin your **free consultation** today.

TSI at a Glance:

- ✓ Customized system design and integration
- ✓ Qualified local technical support
- ✓ Superior customer service
- ✓ Competitive pricing
- ✓ Prompt, accurate quotes. *NO hidden costs and NO change orders within the specified scope of work*
- ✓ Latest technology
